Professional Summary

Web developer with 6+ years of commercial experience in WordPress, React, Node.js and headless CMS. Use AI-assisted development across recent roles, with Claude Code as my main tool at iTrinity. Maintain several production SaaS websites, building custom components, middleware and API integrations with a focus on performance and easy content editing.

Technical Skills

AI-Assisted Development: Claude Code, multi-agent workflows, AI-assisted implementation, refactoring, debugging and code review; manual validation and testing.

WordPress & PHP: Custom themes and plugins, Gutenberg, React, @wordpress/scripts, ACF, WP REST API, WPML, translation synchronization, custom PHP development.

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Vue 3, Astro, HTML5, CSS3, SCSS, Tailwind CSS, responsive Figma implementation.

Backend & integrations: Node.js, Payload CMS, REST APIs, middleware, Intercom, EmailListVerify, HubSpot CMS, Webflow.

Performance & delivery: Core Web Vitals, PageSpeed, TTFB, technical SEO, Schema.org, canonical URLs, Cloudflare Pages/Workers, Git, GitLab CI, GitHub Actions, Docker, Vite, Webpack, npm.

Professional Experience

Web Developer | iTrinity | Remote | May 2025 - Present

- **AI-assisted development:** use Claude Code as my main tool for implementation, refactoring and debugging; use multi-agent workflows for code review, then validate and test changes.
- Maintain several production SaaS websites across WordPress, Astro, Webflow and HubSpot CMS, including Deadline Funnel and Geotargetly.
- Led the migration from ACF layouts to custom React-powered Gutenberg blocks; migrate WordPress websites to Astro.
- Reworked frontend performance and image handling across SaaS projects, including Deadline Funnel, improving PageSpeed on mobile and desktop.
- Collaborated with DevOps on GitLab CI pipelines and Cloudflare Workers for component injection and TTFB improvements.
- Implemented structured data and canonical URL logic; configured WPML and built a GTM Consent Mode v2 cookie banner for Geotargetly.
- Use Payload CMS in production SaaS content workflows, with over one year of experience.
- Develop middleware and API integrations with Intercom, EmailListVerify, HubSpot and other services.

Frontend Developer | PlanetVPN | Aug 2024 - Jan 2025

- **AI-assisted development:** used AI tools for implementation, refactoring and debugging, with manual code review and testing.
- Migrated ACF blocks to dynamic Gutenberg blocks using React and @wordpress/scripts; built Vue 3 components embedded in WordPress pages.
- Maintained production WordPress and Vue.js websites, refactored the codebase and optimized PageSpeed across multiple properties.

Professional Experience Continued

WordPress Developer | BinarGear | Feb 2024 - Jun 2024

- Built the FIB Bank website (fib.iq) from scratch with a custom WordPress theme, RTL support and Kurdish multilingual content.
- Developed Gutenberg and ACF components, integrated an OpenAI-powered chatbot, and optimized PageSpeed and Core Web Vitals.

Frontend / WordPress Developer | Qubstudio | Jul 2023 - Feb 2024

- Refactored approximately 80% of qubstudio.com and implemented its redesign with interactive Gutenberg blocks and ACF components.
- Translated Figma designs into responsive pages in collaboration with designers; handled technical SEO and PageSpeed optimization.

WordPress Developer | Paspartoo | Jan 2023 - Jul 2023

- Integrated aviation data from JSON into a custom WordPress website, mapping records to posts and categories and storing them in the database.
- Built and maintained client websites with Elementor and WPBakery; improved SEO and page performance.

WordPress Developer | PineDev | Jul 2022 - Nov 2022

- Built oib.systems from scratch with an animated product catalog and search across products, categories and documentation.

Freelance Frontend Developer | Paspartoo | Mar 2022 - Jul 2022

- Maintained WordPress websites, updated Shopify pages and built responsive email layouts.

WordPress Developer | Bambuk Design Studio | Oct 2020 - Mar 2022

- Built and maintained ambiq.com with a custom WordPress theme, delivering redesigns and new sections as client requirements evolved.
- Developed custom WordPress themes and plugins; optimized PageSpeed and created SVG and Three.js animations.

Additional Engineering Experience

- Develop custom WordPress plugins for theme-specific functionality and WPML translation synchronization.
- Use AI-assisted development tools for implementation, research and code review, including Claude Code and multi-agent workflows.
